Features:

- High Productivity – up to 650 6" x 4" prints per hour in production mode
- High Precision – Epson Micro Piezo print head with VSDT for resolutions up to 1440x1440dpi with superior half tones, precise colour & density control
- High Quality – Epson UltraChrome D6 ink with a media output heater for prints that exit dry with high depth, vibrant colour, and a durable finish
- High Flexibility – choice of Gloss, Lustre and Matte media from 4" to 12" wide (+ optional A41), print with and without borders in lengths from 3.5" to 48", dual row back-print facility, optional 10-job sorter unit
- Cost Effective to Run – uses large 700ml Ink cartridges & 100m media rolls, requires minimal support and maintenance, reduced power consumption
- Easy to Operate – simple to maintain with no special handling processes, integrated casters for easy movement, convenient front/side loaded consumables & spindle based media, print direct from common photo applications or use optional Epson Order Control software for production management with job costing and image editing functionality
- Easy to Integrate – connects to an Ethernet network via a Printer PC, compact floor standing design, requires minimal operational space, requires no special ventilation, runs off a standard power supply, supplied with an advanced Windows driver with integrated colour control and maintenance support
- High Reliability & Durability – solid and durable construction with a 3 million print duty cycle, backed with a warranty extendable up to 3 years
