Description

The Palomar StarLux 500 is an excellent laser and pulsed light system that will round out any medical practice. The StarLux 500 is the next generation system for the StarLux 300 which is also still a great aesthetic laser system. The StarLux 500 is truly one of the fastest systems on the used market. It offers 70% more power than its competitors, allowing for more treatments delivered in the same time frame. Patients also require less treatments to achieve the same results.
