Description

The **Spectra Galaxy JA 256/80 AAA Printhead** is a high performance, robust and reliable jetting assembly designed for a broad range of wide format printers at resolutions up to 450 dpi. Four electrically independent piezoelectric slices, each with 64 addressable channels, are combined to provide a total of 256 nozzles. The nozzles are arranged in a single line, at a native 0.010 inch distance between nozzles.

To be used with: Agfa :Anapurna XL2 (only for white ink) / Kornit Breeze 921, Dilli Neo Venus UVV-2506GW (only for white ink)

Remarks: Original
